

FAMILY OWNED SINCE 1927

PEDRONCELLI

ESTATE VINEYARD

Dry Creek Valley has a great pedigree for growing and developing great fruit characteristics as well as bright acidity in Sauvignon Blanc. Our estate fruit, totaling 11 acres of vineyard, make up this vintage. There are two blocks, picked a week apart, to bring the best of the varietal aspects to the wine—one with grassy notes and the other with a tropical fruit core. Add these components to the special care and attention from the vineyard crew and the resulting wine is a wonderful reflection of terroir—wherein the sum total of the two blocks creates a unique style.

WINEMAKING

The growing season experienced great conditions with mild summer heat and an uneventful harvest. Although framed by drought this lowered yields which led to deep flavors. For the record Sauvignon Blanc is the first grape we pick. The estate vineyard was harvested the last week of August. The wine shows high concentration of aromatics and varietal flavors with a nice balance between fruit and acidity showcasing the luscious Dry Creek Valley fruit.

Once the grapes are destemmed and pressed the juice goes to stainless steel fermenting tanks to cold soak for 24/48 hours. Inoculated with selected yeast and slow fermentation at about 58F in stainless steel tanks completes the process. Keeping the temperature controlled during fermentation maintains the flavors. The wine is bottled a few months after harvest without oak aging or malo-lactic fermentation bringing the freshness of the vintage to the glass.

TASTING NOTES

Intense aromatics and 'very varietally correct' as our winemaker Montse says. True to the Sauvignon Blanc grape with fresh grass and citrus notes in the nose. The creamy flavors are layered with tropical fruit notes along with a touch of spice and honey. Refreshing with bright acidity and a touch of minerality. Please enjoy upon release or within a year or two as no aging is required.

TECHNICAL INFORMATION

COMPOSITION

100% Sauvignon Blanc

APPELLATION Dry Creek Valley

BARREL AGING None

ALCOHOL 13.9%

pH 3.46

TOTAL ACIDITY .532g/100ml
